

# Automatic Nozzle Protection during CIP

*Dosing valve shut*

- Prevents moisture from entering the dosing head to eliminate potential freeze ups
- Immediate closure after dosing stops
- Hands free operation to eliminate potential contamination
- Withstands high pressure wash down or aggressive chemical clean up
- Eliminates potential wash down operator error
- No lost dosing valve covers

## **Our service – Your guarantee**

Engineered, designed and fabricated cryogenic equipment since 1958.

Trained worldwide service staff.
